Dr. Jacques S. Van Ryn, is an accomplished orthopedic surgeon with a distinguished career spanning over four decades in both military and civilian medicine. He earned his B.S. in Life Science from the United States Air Force Academy and his M.D. from Albany Medical College. Dr. Van Ryn completed his orthopedic surgery residency at Wilford Hall USAF Medical Center and later served as Chairman of the Department of Orthopedic Surgery at Scott Air Force Base. His extensive military service includes leadership roles such as State Air Surgeon for the Missouri Air National Guard and Commander of the 131st Medical Group at Whiteman Air Force Base.

Dr. Van Ryn's clinical expertise encompasses the treatment of complex orthopedic injuries, including fractures, joint dislocations, and degenerative joint diseases. He has a particular focus on knee arthroplasty, infection management in orthopedic surgeries, and trauma care. His civilian practice includes leadership positions at Premier Care Orthopedics and CH Orthopedic & Spine Surgeons, where he provided comprehensive orthopedic care and contributed to practice governance. Dr. Van Ryn's experience in both surgical precision and patient-focused care makes him uniquely qualified to handle a variety of orthopedic cases.

In addition to his clinical practice, Dr. Van Ryn is an esteemed educator and researcher. He directed orthopedic education for the family practice program at Scott Air Force Base. He has peer-reviewed research and publication on infected joint arthroplasty. He has presented on large group practice management to the American Academy of Orthopedic Surgeons. He is a Fellow of the American Academy of Orthopedic Surgeons since 1987, and he has served as president the St. Louis Orthopedic Society. He served for 3 years as Chief of the Medical Staff, Christian Northeast Hospital. Dr. Van Ryn's wealth of experience in orthopedic surgery, military medicine, and leadership roles positions him as a trusted expert for Independent Medical Evaluations (IMEs) and legal testimony. His comprehensive understanding of complex injuries, combined with his clear communication skills, makes him an excellent choice for attorneys seeking expert opinions in orthopedic and trauma-related cases.
