Dr. Joseph S. Yazdi is a highly accomplished neurosurgeon and medical director at Arch Neurosurgery, LLC, in St. Louis, Missouri. With over 25 years of experience, Dr. Yazdi specializes in complex neurosurgical procedures, including minimally invasive spine surgery, traumatic brain injury care, and spinal deformity correction. He received his medical degree from Drexel University College of Medicine and completed his neurosurgery residency at both Hahnemann University Hospital and the University of Medicine and Dentistry of New Jersey, where he served as Chief Resident.

Dr. Yazdi has held numerous leadership roles throughout his career, including serving as Medical Director for Veterans Advantage Urgent Care and as a consultant for leading utilization review companies. He is affiliated with several prestigious medical facilities, such as Christian NE Hospital and Twin Cities Surgery Center, and has previously worked with renowned institutions like Saint Elizabeth's Hospital and The Toledo Clinic. His practice is dedicated to providing patient-centered care for spinal and neurological conditions, with a focus on innovative surgical and non-surgical treatments.

In addition to his clinical expertise, Dr. Yazdi has contributed significantly to medical research and education. He has authored numerous peer-reviewed publications on topics such as Journal of Neurosurgery, Opioid-induced Neurological Complications, Spinopelvic Abnormalities, and nerve protection in minimally invasive procedures. His research has been featured in respected journals like Anesthesiology and World Neurosurgery. Dr. Yazdi is also an engaging lecturer, frequently presenting on topics such as brain injury treatment, spinal trauma, and advancements in neurosurgery at national and regional conferences.

Dr. Yazdi is a member of several professional organizations, including the American Association of Neurological Surgeons and the North American Spine Society. He holds active medical licenses in multiple states and maintains board certification in neurosurgery, having recertified in 2015. His dedication to patient care, research, and education underscores his commitment to advancing the field of neurosurgery and improving outcomes for patients with complex neurological conditions.
