Michael D. Snyder, M.D. is a highly accomplished and board-certified neurologist with specialized expertise in neuromuscular medicine, electromyography (EMG), and headache disorders. He earned his medical degree from the University of Iowa Carver College of Medicine before completing his residency and fellowship in neurology at Barnes-Jewish Hospital, Washington University in St. Louis. With board certifications from the American Board of Psychiatry & Neurology in both Neurology and Neuromuscular Medicine, the American Board of Electrodiagnostic Medicine, and the United Council of Neurologic Subspecialties in Headache Medicine, Dr. Snyder brings an extensive depth of knowledge to his practice. His commitment to excellence in neurological care has been demonstrated through his leadership roles in both hospital and private practice settings.

Over the course of his career, Dr. Snyder has served in a variety of roles, including EMG Lab Director at Dean Health System St. Mary's Hospital in Madison, Wisconsin, and Medical Director of Stroke Services at SSM Health St. Clare Hospital. He has also worked as a consultant neurologist for multiple hospitals and healthcare organizations, offering his expertise in neurology, headache medicine, and electromyography. His dedication to patient care extends beyond clinical practice—he is actively involved in medical education as a voluntary faculty member at Washington University in St. Louis School of Medicine and has lectured extensively for professional conferences and continuing medical education programs.

Dr. Snyder's consulting experience includes independent medical examinations, peer review evaluations, and expert witness testimony. He has worked with organizations such as Epriori Health and MCMC, as well as serving on the speaker bureaus for leading pharmaceutical companies like Pfizer and AbbVie. His expertise is widely recognized, and he has contributed to research studies and published findings in the fields of neurology and headache medicine. His background in both academic and clinical settings makes him uniquely qualified to provide comprehensive neurological evaluations.

With licensure in multiple states and a broad range of clinical experience, Dr. Snyder is a valuable resource for independent medical evaluations and expert neurological assessments. His ability to analyze complex cases and provide clear, evidence-based opinions makes him a trusted expert for legal and insurance-related cases. Through his extensive medical background and commitment to advancing neurological care, Dr. Snyder plays a critical role in delivering high-quality, objective assessments for patients and attorneys alike.
